

Land, Sea and Air

Where did dinosaurs live?

Land

Many dinosaurs lived on dry land. Some walked on their back legs and had a long tail to help them keep their balance. Other dinosaurs walked on all four legs.

A Baryonyx (ba-ree-o-nix) lived on land.

Sea

Over time, the legs of some dinosaurs **evolved** to become fins. These dinosaurs lived in the sea and were good swimmers.

This is the Ichthyosaurus (ick-thee-o-sor-us) or 'fish lizard'. It had large eyes for finding food and grew to the size of an adult man.

Ichthyosaurus (ick-thee-o-sor-us) fed on squid and fish.
